HR Management

To find and keep the best people, HR professionals need a solution that blends talent acquisition functions of recruiting, hiring, and onboarding with talent management functions of benefits, compensation, and performance management. Our HR module lets you store and track employee information in one paperless system to make all of these processes faster and easier — while allowing you to focus on providing more strategic value to your organization.

Time & Attendance

When it comes to managing your workforce, disparate systems, manual or semi-automated processes, and limited data visibility can prevent you from developing a high-performing, motivated workforce. Our solution automates and simplifies time and absence management, accruals, leave, and scheduling functions with powerful applications that help you control labor costs and reduce compliance risk.

Our HCM solution provides single-source access to accurate employee data across HR, time and attendance, and more. The configurable dashboard offers a single view of employee data for simplified and real-time workforce management.

- Automates all steps in the performance review process

The key to business success starts with recruiting and retaining great people — because satisfied, engaged employees are more productive and invested in ensuring customer satisfaction. Our HR module can help you create this motivated, high-performing workforce.

Talent Acquisition

Our HR module lets recruiters and hiring managers source, track, and evaluate talent while providing a positive, consistent applicant experience. Candidates can easily search jobs and apply online, while managers can post job requisitions, screen and accept applications, and track applicants throughout the pre-hire process. And employees are engaged from the very start with configurable onboarding tools and social media integration.

Talent Management

Our HR module provides agile performance management with custom-defined review forms, an automated review cycle, and alerts that can be linked to compensation management for making fairer and more equitable compensation decisions.

In addition, the system makes benefit plans easier for administrators to set up and manage — which is further aided by employee self-service.

The Marketplace

Similar to a mobile app store, the Marketplace allows you to easily extend the features and functionality of our solution with pre-integrated, complementary applications and services such as eVerify integration and background screening.

Human Resources

Gain more time to focus on strategy instead of paperwork

Our HCM solution's efficiencies free managers to pursue more value-added activities:

- Stores and tracks all employee data in one location
- Eases administrative burden through streamlined processes and less paper
- Enables access to real-time HR data via configurable reports, dashboards, and mobile tools
- Empowers employees with HR self-service and mobile app

Our HR module integrates the capabilities you need to find and keep engaged and productive employees. And by reducing administrative tasks, it frees HR managers to take a more strategic organizational role using real-time data and insights to drive better outcomes.

Powerful reporting

Through the system's single employee record, Our HR module lets you store and track all employee information from one location and create reports to better understand your workforce and help executive teams make more informed decisions.

Paperless HR

Our HCM solution streamlines routine tasks such as benefits open enrollment and performance management using virtually no paper — assisted by employee self-service tools and mobile access. And with built-in, configurable workflows, you can easily manage tasks and schedules associated with job requisitions, new hire onboarding, promotions, compensation, and more.

Simplified compliance

Our solution provides the tools, visibility, and reporting you need to avoid costly noncompliance fines and litigation through proactive compliance management of changing labor laws and regulations such as EEOC reporting, I-9 forms, the Fair Labor Standards Act, and the Affordable Care Act.

Time and Attendance

Streamlined to boost employee satisfaction and bottom-line results

Our HCM solution includes powerful capabilities such as:

- Data collection from various sources
- Attendance policy administration
- Attestation
- Configurable workflows
- Ad hoc reporting
- Employee self-service
- Time-off requests and approvals
- Timesheet approvals
- Exception management
- Points system

From timecard management and labor cost tracking to employee scheduling and absence management, Our solution's timekeeping module helps you better manage your diverse workforce while helping to control labor costs and lower compliance risk.

Efficient time and labor cost management

With our HCM solution, processes are significantly streamlined. For example, its automatic time and attendance data collection from a variety of sources makes it easier than ever to manage your labor data. In addition, flexible, user-defined pay rules help you track your true labor costs — while simplified timecard management facilitates compliance and improves payroll accuracy. And exceptions can be managed in real time to avoid payroll errors and costly rework.

Real-time dashboard visibility

A configurable dashboard lets employees request time off and view schedules, timecards, and more, all from a single screen. The manager dashboard may be tailored to provide one-click access to their most frequent tasks and real-time visibility into staff schedules, overtime, exceptions, and other important workforce information.

Support for a more equitable work environment

Our solution uses a point-based system to help you manage attendance policies at a finite level and track adherence to your attendance strategy. Rules can be used to create points in a positive or negative fashion and drive notifications based on thresholds met.

Accrual & Absence Management

Keep it fair and consistent for ongoing compliance

Our HCM solution delivers easy, single-source access to up-to-date information:

- Automatically enforces absence and leave policies to control labor costs
- Consistently applies absence and leave policies to minimize compliance risk
- Helps you gain visibility into absence trends and take action to improve productivity

Absenteeism costs U.S. companies billions of dollars annually in lost productivity, wages, quality issues, and excess management time.¹ But it also impacts productivity and can lower employee morale. Our solution helps you manage employee absence for better cost control and higher productivity, and to ensure that your people are treated fairly.

Accruals

Managing accruals manually can be a painful process — especially since employees accrue time at different rates. Our accruals module automatically and accurately calculates and tracks accrual balances based on your organization's rules, giving managers immediate visibility into current status to help ensure impartial treatment of employees and minimize compliance risk.

Absence Management

Our solution's absence management module helps you handle leave cases accurately and consistently to avoid litigation and grievances. It integrates leave requests and documentation with employee timesheets and schedules and limits unauthorized time off and late returns with built-in notifications. It also automates enforcement of federal, state, and employer-specific leave policies, including the FMLA, as well as administration of leave eligibility and requirements.

Further empower your employees through attestation

Failure to comply with labor regulations and collective bargaining agreements can have disastrous results. But our solution's attestation features minimize compliance risk and improve enforcement of wage and hour policies by empowering employees to access, review, and approve or reject their timecards and designate whether they took their lunch break or not when they punch out.

Scheduling

Always put the right person in the right place at the right time

Our HCM solution provides the tools and visibility you need to:

- Build schedules based on available budget and business demand
- Fill schedules with best-fit employees to maximize performance while minimizing compliance risk
- Manage schedules to maintain accurate coverage and avoid budget overspend
- Measure schedule effectiveness to drive continuous improvement

In today's dynamic workplace, using spreadsheets and paper to create employee schedules is no longer an effective way to staff shifts with the right employees to optimize productivity and control labor costs. With our solution, time-consuming, error-prone processes are a thing of the past.

Streamlined, accurate scheduling

Develop schedules that help you meet performance goals without exceeding budget with the tools and high-quality information you need to schedule the right people in the right place at the right time. Users can build, fill, manage, and measure best-fit schedules that align output and service-level goals with budget and demand. And automated scheduling rules and policies enforcement helps improve employee morale while reducing the potential for grievances, litigation, and fines.

Improved visibility

Gain on-demand visibility into schedules — from a desktop or mobile device — to improve your responsiveness. Robust reporting allows you to measure schedule effectiveness and apply lessons learned so your managers can spend less time creating and managing schedules and more time focusing on strategic priorities.
